

E-System Management User Guide

This is a comprehensive user guide for the E-System Management module.

The guide covers all aspects of the system including:

Key Sections Covered:

Introduction – Overview of the module's purpose and features

System Overview – Document types and workflow states

User Roles – Detailed role definitions and permissions

Getting Started – Navigation and setup instructions

Document Management – Complete workflows for:

- Memo creation and management
- Circular management
- Procurement documents
- General documents

Approval Workflows – Detailed approval processes

Signature & Acknowledgment – Digital signature and acknowledgment systems

Dashboard & Reporting – Analytics and reporting features

Security & Compliance – Access control and security features

Troubleshooting – Common issues and solutions

Best Practices – Usage recommendations and optimization

The guide is structured as a complete reference manual that users can follow for any scenario, from basic document creation to complex approval workflows. It includes step-by-step instructions, troubleshooting tips, and best practices to ensure effective use of the system.

Introduction

The E-System Management module is a comprehensive electronic document management system designed for internal organizational communications. It provides a structured workflow for creating, reviewing, approving, and managing memos, circulars, and procurement documents with built-in signature and acknowledgment capabilities.

Key Features

- **Multi-Document Types:** Support for memos, circulars, procurement documents, and general documents
- **Workflow Management:** Automated approval workflows with quality assurance, recommendation, and approval stages
- **Digital Signatures:** Integrated signature collection and validation
- **Acknowledgment System:** Track document acknowledgments and read status
- **Dashboard Analytics:** Visual dashboards for monitoring document status and performance
- **Security Controls:** Role-based access control with confidentiality levels
- **Template System:** Pre-configured templates for consistent document formatting
- **Reporting:** Comprehensive reporting and document history tracking

System Overview

Document Types

The system supports four main document types:

1. **Memos**: Internal communications requiring formal approval workflow
2. **Circulars**: Organization-wide announcements and notices
3. **Procurement**: Procurement-related documents with financial tracking
4. **General**: Standard documents with simplified workflow

Workflow States

All documents progress through standardized workflow states:

- Draft**: Initial creation stage
- Quality Assurance**: Under quality review
- Complete Quality Assurance**: QA review completed
- Change Requested**: Modifications requested
- Recommend**: Under recommendation review
- Pending Approval**: Awaiting final approval
- Approved**: Approved and ready for publication
- Published**: Published and accessible to target audience
- Rejected**: Rejected with reasons documented
- Locked**: Archived and read-only

User Roles and Access Control

Role Definitions

1. E-Submission Responsible Officer

- Permissions**: Create and submit documents, view own documents
- Responsibilities**: Document creation, initial submission, responding to change requests
- Access Level**: Limited to own documents and assigned tasks

2. E-Submission Quality Assurance

- Permissions**: Review documents for quality, request changes, approve for next stage
- Responsibilities**: Quality review, compliance checking, process adherence
- Access Level**: Documents assigned for QA review

3. E-Submission Recommender

- Permissions**: Review and recommend documents for approval
- Responsibilities**: Content review, recommendation for approval/rejection
- Access Level**: Documents assigned for recommendation

4. E-Submission Approver

- Permissions**: Final approval authority, publish documents
- Responsibilities**: Final approval decision, document publication
- Access Level**: All documents pending approval

5. E-Submission IT Team

- Permissions**: System administration, user management, configuration
- Responsibilities**: System maintenance, user support, configuration management
- Access Level**: Full system access with administrative privileges

Security Levels

Documents can be classified with three security levels:

Private: Restricted to specific users only

Confidential: Available to authorized personnel

Public: Organization-wide visibility

Getting Started

Accessing the System

1. Log into the Odoo system with your credentials
2. Navigate to the **EDMS** menu in the main navigation
3. Select the appropriate document type dashboard

Dashboard Navigation

The system provides four main dashboards:

Generals Dashboard: For general document management

Memos Dashboard: For memo specific workflows

Circular Dashboard: For circular announcements

Procurement Dashboard: For procurement documents

User Profile Setup

1. Ensure your user profile includes:
 - **Correct department assignment**
 - **Appropriate role permissions**
 - **Signature configuration**
 - **Contact information**

Memo Management

Creating a New Memo

Step 1: Basic Information

1. Navigate to **Memos Dashboard**
2. Click **Create** button
3. Fill in the following fields:
 - **-Title**: Descriptive memo title
 - **Memo Date**: Defaults to current date
 - **Branch**: Select your organizational branch
 - **Subject**: Brief description of the memo purpose
 - **Responsible Officer**: Automatically assigned to creator

Step 2: Content Development

1. **Purpose Section**: Describe the reason for the memo
2. **Background Section**: Provide context and background information
3. **Motivation Section**: Explain the rationale and expected outcomes
4. **Recipient**: Specify intended recipients
5. **Enquiries**: Provide contact information for questions

Step 3: Document Classification

1. **Submission Type**: Select "Memo"
2. **Record Security**: Choose appropriate confidentiality level
3. **Target Group Audience**: Select relevant user groups
4. **Target Audience**: Specify job roles if applicable

Step 4: Financial Information (if applicable)

1. **Is Financial Detail Visible**: Check if financial information should appear
2. **Under Grant Management**: Select grant type (HSDG/ISOPG)
3. Complete financial fields:
 - Funds, Responsibility, Objective, Item, Project
 - Asset, Regional Identifier, Amount Paid, Service Provider
 - Infrastructure details

Step 5: Approval Workflow Setup

1. **Quality Assurance Required**: Enable if QA review needed
2. **Quality Assurance Users**: Add QA reviewers
3. **Recommenders**: Add recommendation reviewers
4. **Approver**: Assign final approver
5. **Require Acknowledgment**: Enable if acknowledgment tracking needed

Step 6: Supporting Documents

1. **Document Upload**: Attach supporting documents
2. **Template Selection**: Choose appropriate template if available
3. **Additional Attachments**: Include any supplementary materials

Memo Workflow Process

Stage 1: Draft to Quality Assurance

1. Complete all required fields
2. Attach supporting documents
3. Submit for quality assurance review
4. System automatically assigns to QA reviewers

Stage 2: Quality Assurance Review

1. QA reviewers receive notification
2. Review document for:
 - Content accuracy and completeness
 - Compliance with organizational standards
 - Proper formatting and structure
3. Actions available:
 - **Approve**: Forward to recommendation stage
 - **Request Changes**: Return to creator with feedback
 - **Reject**: Document rejected with reasons

Stage 3: Recommendation Review

- Recommenders review the document
- Provide recommendations for approval/rejection
- Add recommendation comments
- Forward to approver with recommendation status

Stage 4: Final Approval

1. Approver reviews document and recommendations
2. Makes final decision:
 - Approve**: Document moves to published status
 - Reject**: Document rejected with documented reasons
3. Add approval comments and signature

Stage 5: Publication and Acknowledgment

- Approved documents become accessible to target audience
- Users can view and acknowledge documents
- System tracks acknowledgment status
- Document locked for editing after publication

Memo Management Actions

Editing Memos

- **Draft Stage:** Full editing capabilities
- **QA Stage:** Limited editing, requires acting letter for changes
- **Post-Approval:** Read-only, changes require new version

Version Control

- System maintains version history
- Major changes require new document version
- Minor corrections handled through change request process

Document Search and Filtering

- Search by memo number, title, or content
- Filter by status, date range, department
- Advanced search with multiple criteria

Document Templates

Template Management

Templates provide standardized formats for:

- Consistent document structure
- Pre-defined content sections
- Organizational branding
- Regulatory compliance
- Efficiency improvement

Template Types

- Memo Templates:** Standard memo formats
- Circular Templates:** Announcement formats
- Procurement Templates:** Procurement-specific formats
- General Templates:** Flexible document formats

Template Usage

- 1.**Template Selection:** Choose appropriate template
- 2.**Template Application:** Auto-populate standard sections
- 3.**Content Customization:** Add specific content
- 4.**Template Validation:** Ensure compliance with template
- 5.**Template Updates:** Maintain current templates

Template Configuration

- Template creation and editing
- Section configuration
- Field mapping
- Approval workflow assignment
- Version control

General Documents

General Document Features

General documents provide simplified workflow for:

- Information sharing
- Policy updates
- Meeting minutes
- Administrative notices
- Training materials

General Document Workflow

- 1.**Creation**: Author creates document
- 2.**Review**: Optional review process
- 3.**Approval**: Simplified approval if required
- 4.**Distribution**: Targeted distribution
- 5.**Archive**: Long-term storage and access

General Document Management

- Flexible workflow configuration
- Simplified approval process
- Basic acknowledgment tracking
- Standard reporting features

Approval Workflows

Workflow Configuration

The system supports configurable approval workflows based on:

- Document type
- Financial thresholds
- Department requirements
- Regulatory compliance
- Organizational policies

Approval Hierarchy

Standard approval hierarchy includes:

- 1.**Quality Assurance**: Content and compliance review
- 2.**Recommendation**: Management recommendation
- 3.**Final Approval**: Authority approval
- 4.**Publication**: Document distribution

Approval Actions

Available actions at each stage:

- **Approve**: Forward to next stage
- **Request Changes**: Return with feedback
- **Reject**: Reject with documented reasons
- **Delegate**: Assign to alternate approver
- **Comment**: Add review comments

Approval Notifications

- Email notifications to assigned reviewers

- Dashboard alerts for pending actions
- Escalation for overdue approvals
- Mobile notifications if configured

Circular Management

Creating a New Circular

Step 1: Circular Information

1. Navigate to **Circular Dashboard**
2. Click **Create** button
3. Complete basic information similar to memos
4. **Submission Type**: Select "Circular"

Step 2: Circular-Specific Content

1. **Purpose**: Clear statement of circular intent
2. **Effective Date**: When the circular takes effect
3. **Expiry Date**: If applicable
4. **Distribution Method**: How circular will be distributed

Step 3: Audience Targeting

1. **Organization-wide**: Select if for entire organization
2. **Department-specific**: Target specific departments
3. **Role-based**: Target specific job roles
4. **Individual targeting**: Select specific recipients

Circular Workflow

Circulars follow a simplified workflow:

1. **Creation**: Author creates circular content
2. **Review**: Optional quality review
3. **Approval**: Final approval for distribution
4. **Publication**: Distributed to target audience
5. **Acknowledgment**: Track acknowledgments if required

Circular Distribution

Automatic notification to target audience

Dashboard visibility for quick access

Email notifications if configured

Acknowledgment tracking and reporting

Procurement Management

Creating Procurement Documents

Step 1: Procurement Classification

1. Navigate to **Procurement Dashboard**
2. **Submission Type**: Select "Procurement"
3. **Procurement Type**: Specify procurement category
4. **Procurement Method**: Select procurement method

Step 2: Financial Details

1. **Budget Information**: Current budget allocation
2. **Estimated Cost**: Projected procurement cost
3. **Funding Source**: Identify funding source
4. **Financial Approval**: Required financial approvals

Step 3: Vendor Information

1. **Vendor Selection:** Pre-qualified vendors if applicable
2. **Evaluation Criteria:** Scoring and selection criteria
3. **Contract Terms:** Standard terms and conditions
4. **Delivery Requirements:** Timeline and specifications

Step 4: Compliance Requirements

1. **Regulatory Compliance:** Meet procurement regulations
2. **Approval Authority:** Appropriate approval levels
3. **Documentation:** Complete procurement documentation
4. **Audit Trail:** Maintain complete audit trail

Procurement Workflow

Procurement documents follow enhanced approval process:

1. **Technical Review:** Technical specifications review
2. **Financial Review:** Budget and funding verification
3. **Legal Review:** Contract terms and compliance
4. **Management Approval:** Final management approval
5. **Procurement Execution:** Implementation phase

Procurement Tracking

Vendor response tracking

- Evaluation and scoring
- Contract award documentation
- Performance monitoring
- Payment processing integration

Acknowledgment System

Acknowledgment Requirements

- Mandatory acknowledgment for critical documents
- Optional acknowledgment for informational documents
- Group-based acknowledgment requirements
- Time-based acknowledgment deadlines

Acknowledgment Process

- 1. **Document Access:** User accesses document
- 2. **Acknowledgment Request:** System prompts for acknowledgment
- 3. **Acknowledgment Action:** User confirms acknowledgment
- 4. **Acknowledgment Recording:** System records acknowledgment
- 5. **Acknowledgment Reporting:** Generate acknowledgment reports

Acknowledgment Tracking

- Individual acknowledgment status
- Group acknowledgment completion
- Overdue acknowledgment alerts
- Acknowledgment compliance reporting

Signature

Digital Signature Process

Signature Collection

- 1.**Signature Assignment**: System assigns signature requirements
- 2.**Signature Notification**: Users notified of signature requests
- 3.**Signature Collection**: Digital signature capture
- 4.**Signature Validation**: Verify signature authenticity
- 5.**Signature Storage**: Secure signature storage

Signature Types

Digital Signatures: Cryptographic signatures

Electronic Signatures: Click-to-sign options

Handwritten Signatures: Stylus or touch signatures

Initials: Initial-based approval

Dashboard and Reporting

Dashboard Features

Each dashboard provides:

- **Status Overview**: Document status distribution
- **Performance Metrics**: Processing time and efficiency
- **Pending Actions**: Items requiring attention
- **Recent Activity**: Latest document updates
- **Quick Access**: Frequently accessed documents

Dashboard Views

- **Kanban View**: Visual status board
- **List View**: Detailed document list
- **Graph View**: Analytical charts and metrics
- **Calendar View**: Timeline-based view

Reporting Capabilities

Standard Reports

- **Document Status Report**: Current status of all documents
- **Approval Performance**: Approval time and efficiency
- **Acknowledgment Report**: Acknowledgment compliance
- **User Activity Report**: Individual user activity
- **Department Summary**: Department-level statistics

Custom Reports

- Filter-based reporting
- Date range analysis
- User-specific reports
- Department comparisons
- Export capabilities

Report Scheduling

- Automated report generation
- Email distribution
- Scheduled delivery
- Format options (PDF, Excel, CSV)

Security and Compliance

Access Control

Role-based access control ensures:

- Appropriate user permissions
- Document confidentiality
- Workflow authorization
- Audit trail maintenance
- Compliance requirements

Data Security

Encryption: Data encryption at rest and in transit

Authentication: Multi-factor authentication support

Authorization: Role-based permissions

Audit Logging: Complete activity logging

Backup: Regular data backup and recovery

Compliance Features

Regulatory Compliance: Meet regulatory requirements

Document Retention: Automated retention policies

Privacy Protection: Personal data protection

Audit Trail: Complete audit trail maintenance

Reporting: Compliance reporting capabilities

Confidentiality Levels

Private: Restricted access to specific users

Confidential: Authorized personnel access

Public: Organization wide access

Department: Department specific access

Role-based: Job role-based access

Troubleshooting Common Issues and Solutions

Document Creation Issues

Issue: Cannot create new document

Solutions:

- Verify user permissions and roles
- Check department assignment
- Ensure required fields are completed
- Validate template selection

Workflow Issues

Issue: Document stuck in workflow

Solutions:

- Check approver assignments

- Verify notification settings
- Review escalation rules
- Contact IT support for manual intervention

Signature Issues

Issue: Signature not saving or validating

Solutions:

- Clear browser cache
- Check signature configuration
- Verify user permissions
- Try alternative signature method

Access Issues

Issue: Cannot access documents

Solutions:

- Verify user role assignments
- Check document security settings
- Confirm department membership
- Review target audience settings

Notification Issues

Issue: Not receiving notifications

Solutions:

- Check email configuration
- Verify notification preferences
- Review spam/junk folders
- Test notification system

Performance Issues

Issue: System running slowly

Solutions:

- Clear browser cache
- Check network connectivity
- Reduce document size
- Contact IT for system optimization

Error Messages

Common error messages and resolutions:

- **"Access Denied"**: Check user permissions
- **"Invalid Signature"**: Verify signature configuration
- **"Workflow Error"**: Check workflow configuration
- **"Template Error"**: Validate template settings

Support Contact Information

- **IT Help Desk**: Primary support contact
- **System Administrator**: For configuration issues
- **Department Coordinator**: For workflow questions
- **Training Team**: For user training needs

Best Practices

Document Creation Best Practices

Content Guidelines

- Use clear, concise language
- Structure content logically
- Include all required information
- Proofread before submission
- Follow organizational style guide

Template Usage

- Select appropriate templates
- Maintain template consistency
- Update templates regularly
- Validate template compliance
- Provide template feedback

Workflow Management

- Understand approval processes
- Plan for approval timelines
- Communicate with reviewers
- Respond promptly to feedback
- Track document progress

Approval Process Best Practices

For Approvers

- Review documents promptly
- Provide constructive feedback
- Document approval decisions
- Communicate with requesters
- Maintain approval standards

For Requesters

- Submit complete documents
- Respond to feedback quickly
- Provide additional information when requested
- Track approval status
- Plan for approval delays

Signature and Acknowledgment Best Practices

Signature Management

- Use secure signature methods
- Verify signature authenticity
- Maintain signature records
- Update signature as needed
- Protect signature privacy

Acknowledgment Compliance

- Acknowledge documents promptly
- Understand acknowledgment requirements
- Track acknowledgment status
- Follow up on overdue acknowledgments
- Maintain acknowledgment records

Security Best Practices

Access Management

- Protect login credentials
- Log out when finished
- Report suspicious activity
- Update passwords regularly
- Use secure networks

Document Security

- Classify documents appropriately
- Limit access to necessary users
- Protect confidential information
- Follow retention policies
- Maintain audit compliance

System Maintenance Best Practices

Regular Maintenance

- Update user information
- Review role assignments
- Update templates regularly
- Monitor system performance
- Backup important data

Training and Support

- Attend training sessions
- Review user guides regularly
- Provide system feedback
- Share best practices
- Support new users

Performance Optimization

Document Management

- Keep documents concise
- Use appropriate file formats
- Compress large attachments
- Archive old documents
- Clean up unused files

System Usage

- Use appropriate views
- Filter data effectively
- Optimize search queries

- Minimize system load
- Follow system guidelines

Quick Reference

Emergency Procedures

System Down: Contact IT immediately

Security Breach: Report to security team

Data Loss: Contact system administrator

Access Issues: Contact department coordinator

Training Needs: Contact training team

Contact Information

IT Support: [IT Support Contact]

System Admin: [System Admin Contact]

Training Team: [Training Contact]

Security Team: [Security Contact]
